

About Modern Education Society, Vita

Modern Education Society was established in 1978 with an aim to impart Education to the children of the drought affected area. It was the first to start an English Medium School in Khanapur Taluka, in Sangli District. It started with small class of twenty students and then slowly flourished with English Medium School, Marathi Medium School, College of Education, and Junior College of Science. Now around three thousand students are studying under one roof of Modern Education Society.

The Former President of our Modern Education Society, Shri Chintamani K. Gulavani was a devoted social worker and a man of vision. He dreamed to bring social reform through Education. We organize a seminar in his memory every year after his sad demise in 2007.

A small seed slowly flourished in a big tree with a full flaged English Medium School from Nursery to X Std. A Marathi Medium School from Nursery to X Std. A B.Ed. College, a D.Ed. College & a Junior College of Science. Since its inception in 1978 the institution has magestically scaled the ladder of success. Since the first batch of our X Standard we have got a record that every year our student has stood first in the centre. Both Marathi Medium school & English Medium School and B.Ed. have kept the record of more than 85% of passing, each year. Various schemes and plans are executed by the institution for spread of education, upliftment of society and inculcation of values.

Vita, a city known all over India for the gold and silver refineries, yet, remained a village for many a years in regards with modern developments, especially, Education. There was not a single English Medium School, not a professional college in Vita. Modern Education Society is the pioneer in the field of Education in Vita in both the regards.

Not only that the institution started the school & the college, but it also created awareness about quality of Education and standard of Education, in the society.

About the Seminar

The need of the hour is to achieve Millennium Development Goals through Empowered Education. Empowerment means moving from enforced powerlessness to a position of power. Education is an essential means of empowering everyone with the knowledge, skills and self-confidence necessary to fully participate in the development process. Graca Machel recently said that one word can summarize why education makes a difference and "that word is 'empowerment'."

It includes significant strategic initiatives and many other small things. This Seminar aims at discussing various aspects of Empowered Education in India.

Some surveys indicate that the position of Indian Universities in the list of the topmost Universities of the world is negligible. On the other hand the fact remains that many Indians in different walks of life are ruling the world from Geology to Space Science. In view of this, the Indian talent must be given proper direction through Empowered Education. In higher education, empowering everyone at different levels is a serious concern and all the Stakeholders, Teachers, Students and Managements should be oriented about this. This National Seminar is an attempt towards the Empowered Education in India.

Modern Education Society, Vita.
